No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 24

Number 1, July 1982

PATTARAPAN PRASASSARAKICH AND WALTER P. WALAWENDER. Application of the Concentric Annular Flow Model to Blood Flow in Tapered Tubes 1

ANDREA J. PASKINS-HURLBURT, NORMAN K. HOLLENBERG, AND HERBERT L. ABRAMS. Tumor Perfusion in Relation to the Rapid Growth Phase and Necrosis: Studies on the Walker Carcinoma in the Rat Testicle 15

KLAUS LEY AND KARL-E. ARFORS. Changes in Macromolecular Permeability by Intravascular Generation of Oxygen-Derived Free Radicals 25

MARK K. FERGUSON, FRANK C. SEIFERT, AND ROBERT L. REPLOGLE. Leukocyte Adherence in Venules of Rat Skeletal Muscle following Thermal Injury 34

HERBERT H. LIPOWSKY, SHUNICHI USAMI, SHU CHIEN, AND ROLAND N. PITTMAN. Hematocrit Determination in Small Bore Tubes by Differential Spectrophotometry 42

F. N. MILLER, I. G. JOSHUA, AND G. L. ANDERSON. Quantitation of Vasodilator-Induced Macromolecular Leakage by *in Vivo* Fluorescent Microscopy 56

J. J. FRIEDMAN AND NORINA E. DEROSE. The Effects of Flow and of Hyperosmolal Superfusion on the K^+ Permeability of Single Capillaries 68

KENNETH G. PROCTOR AND BRIAN R. DULING. Oxygen-Derived Free Radicals and Local Control of Striated Muscle Blood Flow 77

ROBERT LOPEZ, LAWRENCE I. RAND, AND BRUCE R. ZETTER. Absence of Mast Cells in Diabetic Retinopathy 87

JOEL L. BERT AND KENNETH L. PINDER. An Analog Computer Simulation Showing the Effect of Volume Exclusion on Capillary Fluid Exchange 94

HARALD NODDELAND, ALAN R. HARGENS, ROLF K. REED, AND KNUT AUKLAND. Interstitial Colloid Osmotic and Hydrostatic Pressures in Subcutaneous Tissue of Human Thorax 104

TECHNICAL REPORT

KENNETH R. BREIN AND CHARLES E. RIVA. Laser Doppler Velocimetry Measurement of Pulsatile Blood Flow in Capillary Tubes 114

ANNOUNCEMENT 119

Number 2, September 1982

MEMORIAL 121

EDWARD C. CARLSON, MARY E. BURROWS, AND PAUL C. JOHNSON. Electron Microscopic Studies of Cat Mesenteric Arterioles: A Structure–Function Analysis 123

Paul F. McDonagh, Robert W. Gore, and Sarah D. Gray. Perfused Capillary Surface Area in Postural and Locomotor Skeletal Muscle . 142

Michael A. Reidy and Stephen M. Schwartz. A Technique to Investigate Surface Morphology and Endothelial Cell Replication of Small Arteries: A Study in Acute Angiotensin-Induced Hypertensive Rats 158

Jørgen Frøkjaer-Jensen. Permeability of Single Muscle Capillaries to Potassium Ions 168

A. H. Sacks, P. North, and M. Bradley. Gravity Filtration as a Quantitative Viscometric Technique 184

T. W. Secomb and R. Skalak. A Two-Dimensional Model for Capillary Flow of an Asymmetric Cell 194

Brief Communications

Lawrence J. Nugent and Rakesh K. Jain. Monitoring Transport in the Rabbit Ear Chamber 204

John A. Johnson and George Bloom. Precapillary Concentration versus Time Curves in the Perfused Heart 210

Abstracts of Papers Presented at the Seventh Meeting of the Japanese Society for Microcirculation Held February 6 and 7, 1982, at the National Cardiovascular Disease Center, Suita, Japan 213

Abstracts of Papers Presented at a Meeting of the British Microcirculation Society Held April 7 and 8, 1982, at St. Bartholomew's Hospital, London, England 232

Number 3, November 1982

Einar Stranden and Hans O. Myhre. Pressure–Volume Recordings of Human Subcutaneous Tissue: A Study in Patients with Edema following Arterial Reconstruction for Lower Limb Atherosclerosis 241

James G. Walmsley, Robert W. Gore, Ralph G. Dacey, Jr., David N. Damon, and Brian R. Duling. Quantitative Morphology of Arterioles from the Hamster Cheek Pouch Related to Mechanical Analysis ... 249

Eric P. Salathé, R. Venkataraman, and J. F. Gross. Microcirculatory Response to Periodic Pulsations in Capillary Pressure 272

P. G. Vann and J. M. Fitz-Gerald. Flow Mechanics of Red Cell Trains in Very Narrow Capillaries. I. Trains of Uniform Cells 296

C. Dudley Evans and Kenneth R. Diller. A Programmable, Microprocessor-Controlled Temperature Stage for Burn and Freezing Studies in the Microcirculation 314

Susan R. Kayar, Philip G. Archer, Andrew J. Lechner, and Natalio Banchero. The Closest-Individual Method in the Analysis of the Distribution of Capillaries 326

Susan R. Kayar, Philip G. Archer, Andrew J. Lechner, and Natalio Banchero. Evaluation of the Concentric-Circles Method for Estimating Capillary–Tissue Diffusion Distances 342

Debora M. Gawlowski, Arthur B. Ritter, and Walter N. Durán. Reproducibility of Microvascular Permeability Responses to Successive Topical Applications of Bradykinin in the Hamster Cheek Pouch ... 354

Marianne M. Hertz and Olaf B. Paulson. Transfer across the Human Blood–Brain Barrier: Evidence for Capillary Recruitment and for a Paradox Glucose Permeability Increase in Hypocapnia 364

Toshio Ohhashi, Shigeaki Kobayashi, Shigeo Tsukahara, and Takehiko Azuma. Innervation of Bovine Mesenteric Lymphatics: From the Histochemical Point of View 377

Information for Contributors

Microvascular Research (MVR) is an international journal dedicated to the dissemination of fundamental information related to the microvascular field.

Submission of Manuscripts. One original and two complete carbon copies should be sent via first-class mail, in flat form, to **Microvascular Research Editorial Office, Dr. David Shepro, 2 Cummington St., Boston University, Boston, Massachusetts 02215.** MVR will not be responsible for manuscripts lost in the mails.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Microvascular Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript Style. Papers should be typewritten, double-spaced on one side of the paper, with wide margins. The manuscript should be divided into the following sections: Abstract, Introduction, Materials and Methods, Results, Discussion, References, and Acknowledgments. The abstract, which will precede each article, should be 225 words or less and should be typed on a separate sheet. In addition the manuscript should include, on separate pages, (1) the complete title with names of authors and affiliations (including ZIP CODE), (2) running title, consisting of no more than 40 characters including spaces, (3) key words that are suitable as **Index Descriptors,** and (4) the address to which proofs are to be mailed.

Tables. Tables are to be typed on separate sheets and numbered with Arabic numerals. Each table should contain an explanatory title that would make reference to the text unnecessary.

Figures. These should be numbered with Arabic numerals and should be mentioned consecutively in the text. Legends are to be typed together on a separate sheet.

Illustrations, drawn with a lettering set, should be in finished form ready for the printer. Lettering on the original drawing should be large enough (minimum, 4 mm) to be legible after reduction to one-third. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8.5 × 11 inches, with coordinates properly labeled; grid lines that are to show in the engraving should be linked in black.

Photographs should be submitted as glossy prints and not marred by staples, paper clips, or pencil marks. For best reproduction of halftones, provide clear, sharp photographs with adequate contrast. The best results will be obtained if authors match the contrast and density of all figures appearing on a single plate. If this is not possible, please provide unounted original art. Providing an overlay that indicates the most critical areas of micrographs will also aid in ensuring high-quality reproduction. The dimensions of the printed page are 5 × 8 in. (127 × 203 mm). It is recommended that micrographs be submitted as near as possible to this size so that large reductions will not be necessary.

Color illustrations are acceptable, but at the author's expense. An excessive number of tables or illustrations may necessitate a charge to the author.

Footnotes. These should be designated in the *text* by superscript *numbers* and typed on a separate sheet; in the tables by superscript *letters* and typed at the bottom of the table.

Abbreviations. In general these should follow the usage employed by Chemical Abstracts. The Handbook for Authors of the American Chemical Society is also an acceptable guide.

References. Citations in the text consist of the author's name, and the year of publication in parentheses. The references should be listed alphabetically and should conform to the following style:

SIMIONESCU, N., SIMIONESCU, M., AND PALADE, G. E. (1978). Structural basis of permeability in sequential segments of the microvasculature of the diaphragm: I. Bipolar microvascular fields. *Microvasc. Res.* **15,** 1–16.

BELAMARICH, F. A. (1976). Hemostasis in animals other than mammals: The role of cells. *In* "Progress in Hemostasis and Thrombosis" (T. Spaet, ed.), Vol. 3, pp. 191–220. Grune and Stratton, New York.

Abbreviations of journal names should follow the style of Chemical Abstracts' *ACESS, Service Source Index* (1969 Edition). Unpublished observations and personal communications should be cited in the *text* as such.

Reprints. Authors will receive 50 reprints at no charge. Additional copies may be ordered when galley proof is mailed.

Brief Communications. Preliminary reports will be reviewed for prompt publication; however, the comments must be restricted to no more than five typewritten pages, including references, tables, and illustrations. No abstract should be included.

To facilitate the publication of manuscripts, especially those papers based upon a new, theoretical concept, the Editors invite each contributor to submit the names of at least three scientists who could review the submitted manuscript.
